

BUILDING THE FUTURE TOGETHER

THE POWER OF EPC

At RP Constructors and Civil Engineers & Constructors, we believe that great results come from great integration. Our EPC model (Engineering, Procurement, and Construction) allows us to manage every project phase under one roof. That means greater efficiency, tighter cost control, and stronger accountability from concept through completion.

Every project we take on is an opportunity to demonstrate what's possible when engineering expertise and field execution work as one. From industrial infrastructure to municipal utilities, we're proud to deliver solutions that last — built safely, built smart, and built to perform.

We continue to grow and strengthen across all divisions, expanding what we can deliver for our clients in 2026 and beyond:

- **Welding & Fabrication:** Precision craftsmanship for industrial and structural applications.
- **Plumbing & Mechanical Systems:** Turnkey solutions that keep facilities efficient and dependable.
- **Concrete & Paving:** Durable foundations and surfaces built for performance and longevity.
- **Underground Utilities:** Expert installation for critical infrastructure and environmental resilience.
- **Vac Truck & Bypass Pumping:** Rapid, safe, and compliant service when uptime matters most.
- **Engineering & Design:** Comprehensive planning, modeling, and field-ready documentation.
- **Construction Management:** Experienced teams coordinating materials, people, and production.

Whether it's a fast-track industrial expansion or a complex public works project, RP and CEC bring depth, resources, and precision to every job.

A SEASON OF MOMENTUM

As we enter the final stretch of the year, our teams are completing a strong lineup of projects across the Midwest. From paving operations in commercial developments to industrial site expansions, this fall has been about finishing strong and setting the tone for 2026.

Our crews and engineers continue to raise the bar for quality, safety, and schedule performance — a reflection of the trust our clients place in us and the pride our people take in their craft.

Looking Ahead

The year ahead brings expansion in multiple directions — new markets, advanced capabilities, and a continued focus on innovation.

- Our engineering and licensing teams are opening doors to larger, multi-state EPC projects.
- Field divisions are adding capacity and technology to improve precision and efficiency.
- Procurement and logistics systems are being streamlined to give clients faster turnaround and clearer visibility.

Our commitment remains the same: to deliver excellence through integration — engineering, procurement, and construction working seamlessly together.

Thank You!

We're grateful for the trust of our clients, partners, and communities who make our work possible. Every project we complete is built on collaboration — between those who design, those who build, and those who believe in better infrastructure.

From all of us at RP Constructors and Civil Engineers & Constructors, thank you for being part of our journey.

Let's keep building the future — together.
